

1. Title Slide

- Project title
- Team Members Name
- Guide Names
- Course/Department
- University name
- Date of presentation

2. Introduction

- Brief introduction to the topic
- Importance of the study
- Objectives of the project
- Economic and Other Benifit

3. Background

- Literature review
- Historical context or background of the problem
- Technology Used

4. Problem Statement

- Clear definition of the problem you are addressing
- Relevance of the problem in the current context

5. Research Question(s)

- Primary question your project aims to answer
- Any secondary questions

6. Hypothesis/Thesis/Outcome Statement

- Your main prediction or assertion

7. Methodology

- Type of research (qualitative, quantitative, mixed)/Project
- Data collection methods
- Tools and materials used

8. Scope and Limitations

- Scope of your study
- Limitations faced during research

9. Project Timeline

- Timeline of your project development phases

10. Data Analysis

- Presentation of collected data
- Methods of data analysis used

11. Findings

- Summary of key findings

12. Discussion

- Interpretation of findings
- Link to the research questions/hypothesis

13. Comparative Analysis

- Comparison with existing solutions or theories (if applicable)

14. Innovations or Unique Aspects

- Any innovative approach or unique aspect of your project

15. Practical Applications

- How your findings can be applied in real-world scenarios

16. Future Work

- Suggestions for future research
- Unexplored areas in your study

17. Challenges and Learnings

- Challenges faced during the project
- Key learnings from the project

18. Conclusion

- Summarize the main points of your presentation
- Restate the significance of your findings

19. Acknowledgments

- Thank your supervisor, team members, and any other contributors

20. Q&A / Discussion

- Invite questions from the audience or panel
